## SLUGGISH TONE IN LOCAL TRADE

Good Fall Business is Opening

is good, but tight for all speculative

George Rust, the local manager for R. G. Dun & Co., bears out the above statements in his remarks on the local condition at the close of the week. The good dividends from the mines, the enormous beet crop, and the good prices prevailing for all farm products, including fruit, are factors that are being felt in the local trade situation giving a buoyant tone to all lines of busings. ing a buoyant tone to all lines of busi-

Real estate had another dull week. Real estate had another dull week. There were no good sales reported and the demand for high-priced property was light. A feature of the week was the demand for houses for rent by people who are moving into the city for the purpose of placing their children in school here. The demand along this line is marked and is considered an encouraging stem.

couraging sign.

Nothing new developed during the week in the building line. Work was carried along on all the living contracts, and good progress was noted on a number of large buildings in the course of construction. The informa-tion given out that contracts were to be let for the completion of St. Mary's cathedral and that no time was to be lost in pushing this work was encour The superstructure of the federal building on South Main street is about completed and the work of plac-ing the roof is going ahead. The fin-ishing of the interior will follow, and it is the present understanding that this work will continue without inter-ruption throughout the winter.

Little of note took place in the realm f local dividend-paying commercial stocks. Prices remained firm and few shares changed hands. Deseret Savings bank stock sold for \$300 a share during the week, which was high water mark. The directors of the Fremont Sugar company voted during the week to increase the capital stock of the company from \$750,000 to \$1,000,000. The additional capital will be utilized in the onstruction of a pumping plant on the Elgin bench to supply water for the use of the beet growers and the factory. The quotations on the most popular of the local stocks at the close of he week are as follows:

Deseret National bank .. Z. C. M. I.
Home Fire Insurance Co.
Utah Sugar Co. (pfd.)
Utah Sugar Co. (com.)
Stafe Bank of Utah
Deseret Savings bank Zion's Savings Bank & Trust Co... Utah National bank .... Sumpter Valley railroad bonds ...

Bank Clearings.

There was a faling off in the bank clearings for the week of over \$400,000 compared with the clearings of a year before. No special significance is attached to this and is accounted for by the fact that no large transactions passed through the local clearing house during the week, making the clearings stand for the regular run of business. ## WAR ON CODLING MOTH.

State Board of Horticulture Issues Bulletin en Subject.

state board of horticulture yester day issued the following bulletin on the day issued the following bulletin on the war against the codling moth:
"In order to keep the apple crop free from the depredations of the codling moth larva, it is necessary to have the fruit continually covered with a film of the poison spray, paris green or some other arsenical poison. As the later broods of moth are still at work, it is too early yet to leave off spraying the late apples. The later hatchings of worms enter through the sides of the well grown fruit, especially at the part where the fruits touch each other, and thorough work in spraying must be done to keep the enemy in check.

work in spraying must be done to keep the enemy in check.

"Only by keeping everlastingly at it can the orchardists of Utah hope to keep ahead in the warfare against the coding moth. In addition to thorough spraying with the paris green solution throughout the growing season, the state board of horticulture recommends the use of the banding system" as a supplemental means of protecting the orchard against the ravages of this pest. In this practice advantage is taken of the habit of tye larva, seeking sheltered places in which to pupate. It has been demonstrated that enough fruit can be saved in this way to pay good wages for the time spent in systematically following up this system, in addition to spraying.

"The simplest war is to take a strip of gunnyse, or burlap twelve or fifteen inches wide, fold twice or three times and fasten around the trunk of the tree a foot or so above ground. It should reach around the trunk and is conveniently fastened with a nail or a tack. If the trunk of the larvae which escape the spraying will spin their cocoons and pupate beneath the burlap bard, and may there easily be killed. the crop of next year's moths will be di-minished and the crop of worms will be very greatly reduced. In the most care-ful spraying it is a physical impossibil-ity to hit every worm, hence it is very essential that all orchardists put in prac-tice the banding system to keep the ap-ple worm in check. It is the worms that esseane the early spraying that work on ple worm in check. It is the worms that escape the early spraying that work on the late apples and those which escape in the fall pupate through the winter to emerge next spring and hatch more eggs. With continued spraying and banding till the middle of September or later, the worms will be held in check and sound fruit produced.

"A prominent orchardist of Salt Lake county is authority for the statement that if the soil under the apple trees is kept moist in the fall the larva will not pupate there, but will seek the shelter of the hands, where they can afterwards be destroyed."

## COURT NOTES.

Local business is still backward, although the undertone is good and merchants, great and small, look forward to a satisfactory business in the fall and winter. Wholesale and jobbing business for fall and winter defivery is reported good; collections are slow and not on the whole satisfactory; money is plentiful where the security is good, but tight for all speculative contents of the state of the place of beginning. ## PEARS COMING **OUANTITIES**

Time For Preserving Them is at Hand.

PLUMS FOR JELLY ON MARKET

TOMATOES ARE SCARCER AND GRAPES GO DOWN IN PRICE.

Bartlett pears are coming in fast and next week the dealers expect a full market. They are quoted at 5 cents a pound or 30 cents a peck, but during the com-Ing week they will undoubtedly be considerably cheaper. Then will be the time for preserving. Damson plums were on the marget yesterday for making jelly and sold for 40 cents a peck. Tomatoes were not so plentiful on account of the frosts during the last two nights and the price is likely to go up today. Grapes took a slight drop and a second shipment of Concord grapes were received yesterday. Black bass were in demand yesterday on the fish market and their scarcity would not be accounted for by the dealers. What were on the market went for 35 cents a pound and unless shipments are made today there will be none on the market. Spring chickens, dressed, took a rise from 212 cents to 25 cents. Otherwise the poultry market was steady.

Just Long Enough to

See Denver Every day the Burlington starts a luxurious standard sleeping car to St. Louis. It goes through without change, but it is halted in Denver from mid-afternoon until late even-ing-just long enough for the tourist to see Colorado's capital and principal eity, and call on friends or business acquaint-ances there. Convenient ar-rangement: Let me tell you Special rates to St. Louis and

return (direct or via Chicago) are in effect over the Burling-

ton every Tuesday and Friday.
